

Internship

Internship is an important educational process of the study program of the Department of Agriculture and is mandatory for all students. It includes a total of four months of practical training that takes place either in two months, after the completion of the 6th and 8th semester courses, or after the 9th semester. It is carried out in private companies and public sector organizations selected by the Department that are active in branches related to the academic subjects of agricultural science and have the appropriate scientific staff to supervise the students as well as in the Department's research laboratories. The conditions, the way of organization, implementation and evaluation of the internship are described in the relevant internship regulation of the Department of Agriculture.
